

Rapid Testing Solutions for Food, Beverage and Agriculture

Testing of raw ingredients and final products is very important in the Food, Beverage and Agricultural industries, both for regulatory and quality purposes. Testing solutions don't need to be expensive or time consuming.

For over 20 years, we have developed, manufactured and marketed rapid environmental, food, and life science testing solutions to meet the needs of research and industry. Our ongoing collaboration with global government (e.g. WHO, US EPA, USDA, USGS, FDA, Japanese Ministry of the Environment), industry, and academic leaders has allowed us to respond quickly when new threats (e.g. harmful algal blooms, melamine, glyphosate) arise. In addition, Eurofins Abraxis holds, or is exclusive licensee, for several key technology patents.

Eurofins Abraxis is headquartered in the United States and serves our customers directly or through distributors in over 100 countries around the globe.

Versatile Product Portfolio

- Pesticides (e.g. Glyphosate, Atrazine)
- Pathogens (e.g. *E.coli*, Shiga toxins)
- Food Additives
- Veterinary Residues/Ionophores
- GMO's
- Mycotoxins
- Algal Toxins including Cyanotoxins
- Industrial Chemicals and Hydrocarbons
- Surfactants

Rapid Testing Solutions for Food, Beverage and Agriculture

Formats to Suit Every Application

Eurofins Abraxis offers a range of testing options applicable to a wide variety of food and agricultural applications. Our solutions range from fully quantitative assays suitable for in-house laboratory analysis to tests that can easily be performed in non-laboratory environments to support on-site decision-making. Our kits help customers reduce time to results.

Answers in Hours, Not Days

ELISA Plate Assays

- For laboratory based analysis
- Quantitative results
- Answers in ~3-4 hours
- Basic lab skills required
- Lab equipment required

Dipsticks/Test Strips

- For screening and field-based decisions
- Qualitative/semi-quantitative results
- Answers in ~1 hour
- No lab experience required
- No additional equipment required

Our Related Products & Services

Standards & Controls

- Certified and analytical standards
- QC Check samples
- Spiking solutions
- Proficiency testing programs

Sample Collection

- Bottles
- Sample preservation solutions
- Syringes

Sample Prep

- Syringe filters
- Lysis reagents and kits
- Derivatization reagents
- Sample diluent

Analysis

- Test kits
- Pipettes, tips and related consumables
- Training

Results Interpretation

- Automated analyzers
- Plate and strip readers
- Magnetic separators
- Instrument installation, service & repair
